# Full-fibre business phones

WightFibre offers a range of handsets that are known to work with our VoIP telephone system. To make sure that you experience the quality of calls that you'd expect, only IP devices from our portfolio can be used. WightFibre's choice of tested Yealink handsets can be found on the next page.

Full-Fibre IP Phones are ideal for businesses of all sizes. We configure them for you, so they're easy to setup and work just like the phones you're used to.

If you're switching to WightFibre from another phone provider, or simply looking to add more handsets to your existing service, have a look through our range to find the perfect phone for your needs.

## Full-Fibre IP Phones

### SIP-T23G

Cost effective deskphone for lightweight use. Tough enough for most situations, and can be wall mounted if needed.

#### Benefits

## Full-Fibre DECT Phones

### SIP-W53P

Cost effective cordless phone. When your staff need to be mobile, and can be wall mounted if needed.

#### Benefits

- Premium HD voice quality
- 1.8", 128x160 colour TFT display
- Li-ion battery with 200h standby time, 18h talk time
- Supports up to 8 handsets
- 50m/300m indoor/outdoor range
- Optional repeater available
- Supports headsets via 3.5mm socket
- Optional protective case with water and dust proof, and break resistance features

### SIP-W60P

Upgraded cordless phone, with a longer battery life and a larger screen. Can be wall mounted if needed.

#### Benefits

- Premium HD voice quality
- 2.4", 240x320 colour TFT display
- Li-ion battery with 400h standby time, 30h talk time
- Supports up to 8 handsets
- 50m/300m indoor/outdoor range
- Optional repeater available
- Supports headsets via 3.5mm socket

If you need to be able make and receive calls on the move around site, a cordless DECT phone is an ideal choice.

All our DECT phones come with Premium HD voice quality as standard. Each base station supports up to 8 handsets, and a range of up to 50m indoors, or 300m outdoors. You can extend the range with optional repeaters.

## Full-Fibre Conference Phones

### CP960

Optima HD IP Conference Phone. First-class, high performance device for mid-large meeting rooms with up to 20 people

#### Benefits

- HD voice quality
- Harman co-engineered speakers
- Noise Proof Technology reduces distractions from unwanted noise
- 5" 1280x720 pixel multi-touch screen
  - Built in 3-microphone array
- 6m and 360-degree voice pickup
  - Built-in 2.4/5GHz W-Fi
  - Built-in Bluetooth 4.0

Add a pair of CP90W wireless DECT microphones and speakers to enhance the range. The devices can be placed up to 20m from the main conference phone, and extend the voice pickup by an extra 10m beyond that.

Perfect for large conference rooms and boardrooms.

# Further Information

## Why Choose WightFibre?

### We're local

WightFibre is the only Island-based provider of broadband and telephone services. We only use:

### Island engineers

### Island support staff

### Island call centres

### We're fast

The fastest broadband on the Island, powered by state of the art technology. Work faster, harder and quicker.

### We're good value

We'll provide you with what your business needs — and make sure that you don't waste money on features that you won't use.

### We're flexible

You can upgrade your services as your business grows. Our systems can adapt to your needs as and when you need them to, giving you a future-proof system that is always up to date.

### We take your security seriously

Nothing left to chance. We have a Tier 3 data centre and a fully secure, resilient network with multiple links to the mainland. In other words — we've got you covered.

### Great call packages

Keep the costs of communicating down — even when calling mobiles or internationally.

### Trust us...

...to help you make the most of your business. We get 'excellent' ratings on Trustpilot. Compare us to the other providers...
